

FACILITATED WORKING SESSION

AI Governance & Readiness

Help your board and executive adopt AI safely, and govern it with confidence.

WHY IT MATTERS

AI is now a board issue

Artificial intelligence is no longer just a technology question — it is a governance one. Your board does not need to be technical, but it does need to oversee AI, set the risk appetite, and protect member data. This facilitated session takes the fear and the hype out, and replaces them with confidence and a plan.

THE SESSION

What we work through

- 1 Orientation — what AI is**
A shared, plain-English picture of what AI can and cannot do.
- 2 Governance — the board's role**
Overseeing AI, and who owns which decision.
- 3 Your AI readiness**
An honest rating across five dimensions, so you know where to start.
- 4 Guardrails — policy, data and the law**
An AI use policy, member data, and what the new rules require.
- 5 Your AI roadmap**
Start small, prove value, then scale — with one first pilot.

THE EXPERIENCE
